continuity

program

Gain confidence in your readiness

Keeping your business continuity program current and aligned with business recovery requirements is one of the biggest challenges your business faces. Wipfli can help ensure your program stays up to date and that your teams are well prepared.

We don't just develop your business continuity program, we'll administer it too, letting you focus on other vital business objectives.

Let Wipfli ensure the continuity, security and availability of key assets, technology and business processes in the face of adversity.

Experienced and certified business continuity professionals work to develop sustainable and actionable business continuity programs through:

- Understanding the business requirements for availability and tolerance for data loss
- Implementing recovery strategies that meet the business needs
- Documenting procedures to respond, resume and recover
- Validating recovery and continuity strategies through tests and exercises
- Accountability to keep plans up-to-date and aligned with business and technology changes

Our experience and proven methodology results in a reliable and efficient solution.

WIPFLI

Business continuity solutions

Our BC programs are fluid and dynamic to keep up with the changes in your industry and are run by our certified business continuity professionals.

Program planning

Does your company lack a continuity plan? Or is your plan grossly out of date? Wipfli can provide comprehensive Business Continuity Planning Services, including:

- **Business impact analysis:** Identify critical business processes, understand the impact of disruption and establish realistic recovery objectives.
- **Recoverability assessment:** Generate an assessment of your recovery controls to identify “gaps” between the business recovery requirements and recovery capabilities.
- **Recovery strategy and selection:** Review alternatives and select the solution that best fits your needs.
- **Business continuity plan development:** Provide a documented, actionable plan and response procedures for keeping your company in business and for recovering IT and operations within acceptable time frames.

Benefits

Your business continuity strategy covers all the bases. You have a clear path to recovery, and you are ready to react when a crisis strikes.

Let's get started

Wipfli brings together the people, tools and methodology needed to efficiently navigate through the business continuity planning process.

Program administration

Get all the functionality of having your own dedicated and experienced business continuity team, without the expense or drain on your resources. Let Wipfli serve as your in-house business continuity administrator and ensure your readiness. Our services include:

- **Hosting and maintenance:** Get anytime, anywhere access with Wipfli's secure web portal.
- **Business continuity plan validation:** Ensure all critical parts of your business are considered within the continuity strategy.
- **Testing and simulation exercises:** Prepare your recovery teams to respond to and expose any errant recovery strategies in the plan.
- **Readiness assessment and reporting:** Ensure your management team can make informed decisions to best prepare your organization for recovery and assure auditors that your company is meeting its regulatory requirements.
- **Plan updates and maintenance:** Ensure your business continuity plan stays current with changes to your business.
- **24/7 web portal access:** We use the standard Microsoft suite to develop your plans and then make them accessible via our secure web portal.

Benefits

Awareness is increased and preparedness is enhanced. Risks are significantly reduced. And readiness is proven for your executive team, auditors and business partners.
